**Instructors:** Paul Indeglia Ph.D., PE. (Indeglia Environmental)

**Agenda:** Over the past year, the moderate-to-severe drought experienced in New Hampshire has imparted many effects on the State of New Hampshire. Residents, farmers, and water and wastewater utilities have had to make difficult choices about water quantity as well as water quality. While not the first drought to hit New England, it is one of the worse to impact the region in many decades. This six-hour session addresses many issues related to the water cycle and the impacts of drought. Topics discussed will include surface and ground water hydrology, climatic changes on hydrologic cycle, and the economic and ecological impacts of the current drought. The session will cover common mitigation and adaptation techniques that water and wastewater operators can use within their collection, treatment, and discharge systems to address the impacts of drought.

**Registration:** There are three ways to register: register and pay on our website: [www.granitestatewater.org](http://www.granitestatewater.org).
