Agenda: This math course is paced by the progress of the students. Most people taking certification exams claim that math is their weak area. The instructor will cover math concepts and then students will work practice problems on their own with the help of the instructor if needed. The next step is going over the practice problems as a group so everyone has a complete understanding. The environment is a non-stressful informal classroom style course. This course will cover: Basic Review, Conversions, Water Loss, Flow Rate, Pressure psi/Ft of head, Detention Time, Surface loading Rates, Weir Overflow Rates, Pounds Formula, Chemical Dosing, and Horsepower.
