Agenda: The Town of Winchester has taken on the challenge of creating an entire water and wastewater system that is efficient, reliable, and structured to serve its population now and in the future by changing the system's philosophy and culture from reactive to proactive. The Town of Winchester has elected to implement an Asset Management Program to assist with the achievement of this goal. In this round table presentation the key players will share their role in this colossal but achievable undertaking. Hear how the engineers work with and for a municipality, how a superintendent juggles his many hats including the project coordinator, what it takes to use digital mapping to inventory assets, and how other systems can do similar work. A tour of the Winchester Wastewater facility will be part of this training.
